

Re-Upholstery _ Covid 19

Foreword

All Morgan furniture is designed and sustainably manufactured here in Britain at our Hampshire factory. Each piece is carefully crafted to the highest quality, and designed to last many years in service.

In light of the recent global Covid-19 pandemic, there is an unprecedented demand for hygienic solutions, and our Re-upholstery service is on hand to accommodate your requirements.

We can advise regarding **Anti-Microbial** fabric selection and the options of re-upholstering your existing Morgan furniture to achieve any new requirements for hygienic finishes.

Re-invigorate

Re-upholstering provides a fast, sustainable, and cost effective solution, extending the service life and re-invigorating your Morgan furniture.

This process presents an opportunity to implement **Anti-Microbial** upholstery, or change upholstery type, from fabric to faux leather or uplift to genuine leather in accordance with your budget and performance needs.

When selecting new upholstery options, you can explore a different colour, surface texture, or change the tone to give a new ambiance or tactile quality to your Interior.

Consider the addition of loose scatter cushions to add some comfort and style to your furniture, we have a selection of beautiful cushions and filling options to compliment your furniture.

Re-foam

The internal reflex foam has been designed to be comfortable and supportive. We use CMHR foams and are therefore compliant with the necessary industry sector FR ratings.

As with the upholstery, over time, there is some wear expected on the foam, particularly in the main contact areas such as seat and arms.

Examine your furniture and if the foam appears deformed under the fabric, we advise replacement whilst your furniture is booked in with us for re-upholstering.

Once the cover is off, the old foam is removed from the furniture and the new foam set is applied to the framework, ready for re-cover.

All foam waste is recycled by specialists.

Re-cover

Once upholstery options have been confirmed, we schedule collection of your existing furniture, either as a whole set, or by batch.

The new upholstery covers will be carefully hand cut according to the templates and prepared for sewing by our skilled team of upholsterers.

Old covers and tacking nails and strips will be removed for recycling. Waste fabric from the new cutting is given for charity.

After this upholstery preparation, the furniture is ready to be reupholstered in the new covering.

The finished furniture is then quality checked and delivered in accordance with the latest Government guidelines for social distancing.

Contact our customer services department to discuss your requirements, or visit our website for further details:
